INDUSTRY

Commercial

PROJECT OVERVIEW

One of the four Mission Centers of Houston locations was experiencing problems with their existing exterior walls. The walls were weak and damaged due to repeated sports activities over the years. PolySpec Construction Services reinforced the walls with metal studs, insulated the walls and installed decorative Fiberglass Reinforced Panels. Additionally, PolySpec Construction Services installed new shatter-proof windows and panic assist doors.

Mission Centers of Houston serve impoverished communities in the inner city of Houston by providing for the physical and spiritual needs of people. Ministries include: Food and Clothing Distribution, Kids' Clubs, Preteen & Teen Clubs, Senior Adult Ministry, E.S.L. Classes and more.

KEY CONSIDERATIONS

Maintenance/Durability: Because the Mission Centers of Houston support the physical development of so many children, the walls needed to be reinforced, long lasting and insulated.

Fire Safety: Again, because the Mission Centers of Houston serve primarily children, the new walls needed to be fire-rated for the safety of the Center's and the children.

Project Timeline: All work needed to be completed in a short time frame between the end of school and the beginning of summer camps.

Construction Management: Mission Centers of Houston preferred a turnkey upgrade service for this involved project.
