PROJECT OVERVIEW

The Captains' Office required refurbishment of existing flooring, relocation of existing door frame and hardware, new custom furniture and blackout divider curtain, separating sleeping quarters and office.

KEY CONSIDERATIONS

Project Timeliness: The work was performed during active drilling operations so the floor installation had to be completed in a timely manner without disrupting normal job activities.

Project Construction: Custom furniture had to be prefabricated offsite then installed onsite due to schedule constraints.

Aesthetics: New flooring and joiner panels needed to match the existing materials.
